CEA3 Help FISHSIM XP

CEA3 or 'Catch Em All' is a companion for Fishing Simulator 2

A little background
CEA3 is the third release of the script, CEA was first developed in early 2006, with a second version released in 2007 making needed changes to keep up with the vast amount of catch data being collected. CEA3 was created to handle an even bigger collection of data and has had many updates over the years, thanks for being part of CEA's history.

Fishsim2 Resources
If you're not familiar with FS2, learn more about Fishing Simulator 2 by visiting these great resources

General CEA3 script requirements
- Min Fishing Simulator 2 version 2.13d (Version Code **128**)
- Max catch log file size **100 kb**
- Max catches in the log **100**
- Catches expire after **72 Hours** of being in log, depending on time zone

The term **'Combination'** or **'Combo'** is a (Specie + Venue) set, only unique combinations are accepted as new valid combinations.
The term **userset** is a user's collection of combinations stored in the CEA database.

Combination Summary... (Below are examples of new & unique combinations)
New specie and new venue to your Set **95 XP**
New specie to your Set **100 XP**
New venue to your Set **115 XP**
Combination **250 XP** (Any unique combination without adding a new venue or specie to your userset)

Earn extra XP with the CEA3 **Mini-Games**, see the separate help file for more information.
Earn extra XP with the CEA3 **Achievements**, see the separate help file for more information.

Note: *VEN#VenueName* or *SPC#SpecieName* in asterisks are not recognized by CEA3, new venues and species are added when new validated venues and species are released, these may take a few days or more to be updated. Some venues and species are not in the CEA3 translation file and may never be added until there validated. Some however are included that have shown no problems over the years.
